

## Function Profile ENLIGHT student coordinator

In a bid to fundamentally revamp the EU's educational ecosystem, the Commission launched the European University Initiative in a bid to create European Universities, a set of alliances between universities scattered around the EU27. Since 2020 Ghent University can call itself a proud member of the ENLIGHT alliance along with 8 other partners. An important part of the entire ENLIGHT framework are the student coordinators.

The Ghent Student Council is therefore looking for student coordinators to represent the Ghent University students at ENLIGHT. The student coordinators are a member of the Student Network, the main student body of ENLIGHT. As members of the Student Network they represent the student perspective at the different work package meetings (seven in total).

Internally the student coordinators are members of the ENLIGHT student core group which consist of the Ghent Student Council, the International Konvent, the Erasmus Student Network and the Student Activities Office. The ENLIGHT student core group can be viewed as the steering group within the student community.
